WOMAN'S WORLD AND WORK

VANISHING VIRTUES

What has become of the old-fashioned virtues? That's what the girls ask. When home received no reply, they swelled.

For the dying originally asked, "Where are the pillars of society?"

Who were my educational mothers?

From middle school to high school?

What has become of the old faith?

What a simple life and rules!

And most developed a certain plan

Behind the scenes now do we

Where are the women of former days?

Just simple, kindly and fair?

Who would buy the rights of woman?

And could the vulgar start?

What has become of the folks, too?

With more virtue and less?

Now we see them as they are.

We are the people of today.

Women are leaving their homes,

What caused her to go every night?

The Camel-Like Say Water Is Wonderful but Not as a Drink

During all this heated controversy about water, which has swept the business life of thousands of citizens into a chaotic state, and pitted the population into two factions, the dependable city boosters strongly "for" anything that leads to the ultimate progress and prosperity of the city and community, and the opposition firmly opposed to the expenditure of money for water, there is one way to get good water, bearing in mind that water will be raised a few dollars. It is interesting to note that at least a few Tulsans are absolutely neutral on the question, even the nation-wide prohibition movement failing to bring them to a realization of their present condition and ultimate needs.

The following poem, which has recently been printed on cards for distribution, is the creation of Marie Antoinette Marchant, a young girl from the city of Tulsa, who is a member of the Girl Scouts.

Often enough have we Tulsans been out of the reaches of water at our very door. Are we supposed to live like savages? We have seen much of this in the past, and I am now convinced that unless we insist in getting the water supply improved, the city cannot be spared from summer climate and good water.

I have talked with the native hill people and all describe water as being good. They say it is good because it is found in the country, pure, there is no dirt or filth on the banks of the streams, nor for 40 years or more. Why doubt these words? They are simple honest people. Again I say, good water is as represented by the good men of our town who have never failed us.

"Water," says the poet, "is the life of man." I have seen it trickle down the mountain sides in tiny rivulets with the mist of liquid silver striking on beds of polished diamonds. I have seen it in the rushing rivers rippling over pebbly bottoms, paring about, cutting stones, roaring over precipitous falls. It has no rush to join the mighty Father of Waters, and in the mighty ocean it is a tiny stream.
